

Copperleaf Kitchens Branch Operations Manual

Document ID: BO-001 | **Version:** 1.1 | **Effective Date:** February 2025

This manual defines mandatory operating procedures for every Copperleaf Kitchens branch. It is structured for quick retrieval by topic, process, and policy ID. All employees must follow these procedures without exception.

Branch Organizational Roles

Role	Key Responsibility
Branch Manager	Oversee all branch operations and compliance
Shift Lead	Manage daily shift and escalate issues
Line Cook	Food preparation and kitchen safety
Server	Customer service and dining area setup
Cashier	Payments, POS, and cash reconciliation
Security Officer	Access control and incident response
Maintenance Technician	Facility equipment and maintenance

1. Opening Procedures (BO-101)

Follow this sequence before opening the branch to customers. Verify each item and initial the daily log.

Step	Action	Owner
1	Unlock main entrance, disarm alarm, and check for tampering.	Security Officer
2	Power up kitchen equipment: oven EQ-OVN-001, freezer EQ-FRZ-002, and hood vents.	Line Cook
3	Inspect prep area for cleanliness and restock ingredients.	Line Cook
4	Power on POS terminal EQ-POS-001, verify cash drawer balance, and check network.	Cashier
5	Perform safety walkthrough: exit paths, fire extinguishers, and hazard check.	Shift Lead
6	Set up dining area, unlock service entrances, and announce readiness to staff.	Server

Cross-reference: [BO-204](#), [BO-315](#), [BO-410](#).

2. Closing Procedures (BO-101)

Complete these steps after the last customer leaves. No non-essential personnel may remain in the building.

Step	Action	Owner
1	Clean kitchen surfaces, store food in labeled containers, and set correct temperatures.	Line Cook
2	Run end-of-day POS report, reconcile cash drawer, and lock deposit bag.	Cashier
3	Secure all doors and windows, arm alarm, and verify with security.	Shift Lead / Security
4	Switch off non-essential equipment and lights; keep refrigeration and backup power active.	Maintenance Tech

Cross-reference: [BO-410](#), [BO-520](#).

3. Daily Checklist (BO-204)

Area	Task	Frequency	Owner
Food Safety	Check fridge and freezer temperatures (EQ-FRZ-002)	Morning	Line Cook
Hygiene	Sanitize counters, cutting boards, and prep tools	Every 4 hours	Line Cook
Customer Area	Check restrooms, seating, and condiment stations	Every 2 hours	Server
POS	Verify payment terminal, network, and receipt printer	Morning	Cashier
Safety	Inspect exit paths, fire extinguishers, and emergency lights	Each shift	Shift Lead
Back of House	Remove trash, recyclables, and clean garbage area	Hourly	Line Cook

4. Weekly Checklist (BO-204)

- Deep clean walk-in cooler and freezer; verify door seals and temperature logs.
- Test emergency generator EQ-GEN-001 under load for 15 minutes.
- Inspect fire suppression system and kitchen hood filters.
- Review cash handling logs and POS exception reports.
- Restock first aid kits and emergency supplies.
- Confirm all equipment inspection forms are signed and filed.

Cross-reference: [BO-101](#), [BO-315](#), [BO-410](#).

5. Inventory Inspection (BO-204)

Use the form below for each inventory inspection. Record all temperatures, quantities, and disposition.

Item	Lot #	Expiry	Quantity	Temperature	Status
Dairy					OK / Action
Produce					OK / Action
Meat / Seafood					OK / Action

6. Equipment Inspection (BO-204)

Equipment ID	Asset	Inspection Point	Frequency
EQ-OVN-001	Convection Oven	Temperature calibration and door gasket	Daily
EQ-FRZ-002	Freezer	Temperature, ice buildup, door seal	Daily
EQ-POS-001	POS Terminal	Network, receipt printer, cash drawer	Daily
EQ-GEN-001	Backup Generator	Fuel level, battery, test under load	Weekly
EQ-FIRE-001	Fire Suppression	Pressure gauge and discharge nozzles	Weekly
EQ-HVAC-004	HVAC Unit	Air filters and condenser coils	Monthly

Cross-reference: [BO-315](#), [BO-520](#).

7. Generator Procedures (BO-315)

The backup generator EQ-GEN-001 supplies critical equipment during outages. Only trained staff may operate it.

Step	Action	Owner
1	Check fuel level and battery charge; fill if below 50%.	Maintenance Tech
2	Set generator switch to AUTO and confirm no fault codes.	Maintenance Tech
3	Perform weekly 15-minute load test and record readings.	Maintenance Tech
4	During outage, verify transfer switch engages and log start time.	Shift Lead
5	After power returns, switch generator to OFF, reset breakers, and log.	Maintenance Tech

Cross-reference: [BO-204](#), [BO-520](#).

8. Power Failure (BO-315)

A loss of power requires immediate action to protect guests, staff, food, and data. Follow this workflow.

Step	Action	Owner
1	Notify Shift Lead and confirm generator auto-start.	All Staff
2	Keep freezers and refrigerators closed; monitor temperatures.	Line Cook
3	Switch POS terminal EQ-POS-001 to backup battery mode and continue transactions.	Cashier
4	Communicate status to customers; stop accepting new dine-in orders after 30 minutes.	Branch Manager
5	Escalate prolonged outage to Regional Manager and document losses.	Shift Lead

9. POS System (BO-410)

The POS terminal EQ-POS-001 is the central system for all sales, cash, and order data. Never force shutdown during end-of-day processing.

- Startup: Power on terminal, log in with personal PIN, and run startup verification.
- Transactions: Use correct order types, apply discounts only when approved, and issue receipts.
- End of Day: Run Z-report, verify totals, and export data before closing.
- Failure: If POS freezes, restart terminal and verify all transactions were saved; contact IT immediately.
- Never leave the POS screen unlocked; logout after every shift.

Cross-reference: [BO-204](#), [BO-410](#), [BO-520](#).

10. Cash Reconciliation (BO-410)

Perform cash reconciliation at each shift change and at close. Discrepancies must be reported immediately.

Step	Action	Owner
1	Count cash, coins, credit card slips, and gift cards.	Cashier
2	Run POS shift report and compare to physical count.	Cashier
3	Document any variance in the cash log with reason code.	Shift Lead
4	Place deposit in safe; verify with a second witness.	Cashier / Manager
5	Submit reconciliation report to Branch Manager daily.	Shift Lead

11. Delivery Acceptance (BO-410)

All vendor deliveries must be inspected before signing. The receiving employee must verify quantity, quality, and temperature.

1. Verify driver identity and purchase order number.
2. Inspect packaging for damage, leaks, or tampering.
3. Check item count and weights against the delivery receipt.
4. Measure and record temperatures of cold and frozen items.
5. Sign receipt only when accurate; mark discrepancies as exceptions.
6. Log all accepted and rejected items in the Delivery Log Form.

Delivery Log Form	Example
Vendor Name	Fresh Harvest Foods
PO Number	PO-2025-0142
Items Accepted	15 cases / 3 pallets
Items Rejected	2 boxes damaged
Receiving Signature	Generated at time of delivery

Cross-reference: [BO-204](#), [BO-410](#).

12. Customer Complaint Workflow (BO-410)

Use this workflow to resolve complaints consistently. Log every complaint in the CRM with the policy ID for traceability.

Step	Flow / Action	Owner
1	Receive complaint and apologize -> record details.	Server / Cashier
2	Assess urgency and escalate if safety-related.	Shift Lead
3	Offer resolution: refund, replacement, discount, or follow-up.	Manager
4	Implement resolution and update CRM ticket status.	Customer Service
5	Review trend with branch team; document learning.	Branch Manager

13. Emergency Shutdown (BO-520)

Emergency shutdown applies to fire, gas leak, active violence, or structural damage. Safety of people comes first.

Step	Action	Owner
1	Evacuate customers and staff using nearest exits.	Shift Lead / Security
2	Call emergency services and then notify Branch Manager.	Security Officer
3	Shut off gas and fuel supply if safe; do not touch electrical equipment.	Maintenance Tech
4	Close exterior doors, leave lights on, and wait for responders.	Shift Lead
5	Do not re-enter until cleared; preserve incident report evidence.	Branch Manager

14. Maintenance Requests (BO-520)

All facility issues must be logged using the Maintenance Request Form. Emergency requests take priority.

1. Identify issue and tag equipment ID if applicable.
2. Submit request via maintenance portal or paper form.
3. Maintenance Tech triages by urgency.
4. Complete repair and record action on the asset log.
5. Branch Manager verifies and closes the request.

Priority	Response Time	Example
Emergency	Immediate	Gas leak, fire, no power
Urgent	Within 2 hours	Freezer failure, POS down
Routine	Within 48 hours	Lighting, HVAC filter

15. Security Procedures (BO-520)

- Only authorized employees may enter storage and office areas.
- Alarm codes are personal and must never be shared.
- Contact Security Officer for suspicious persons, vehicles, or packages.
- Secure all deliveries at the receiving dock; never prop doors open.
- Report lost keys or access cards immediately to the Branch Manager.

16. Night Shift Procedures (BO-520)

Task	Frequency	Owner
Walk exterior perimeter and verify doors are locked.	Every hour	Security Officer
Monitor camera feeds and alarm panel.	Continuous	Security Officer
Inspect overnight food storage temperatures.	At 2 AM	Night Lead
Log any incidents or suspicious activity.	As needed	Security Officer

Frequently Asked Questions

Q: Who can approve a non-standard opening delay? A: The Branch Manager or Shift Lead must document the reason and notify the Regional Manager.

Q: What should I do if the generator fails during a power outage? A: Keep refrigeration closed, secure POS transactions, call Maintenance Tech immediately, and follow the Emergency Shutdown procedure if needed.

Q: How soon must cash discrepancies be reported? A: Immediately during reconciliation and before the deposit bag is sealed.
