

Copperleaf Kitchens

Food Safety & Hygiene Manual

Document ID: FS-001

Version: 3.0

Effective Date: January 1, 2025

Review Date: December 31, 2025

Owner Department: Food Safety Office

Classification: Internal Use Only

Approved By: Food Safety Director

Revision History

Version	Date	Description
1.0	Jan 2023	Initial release
2.0	Jun 2024	Updated temperature policies
3.0	Jan 2025	Comprehensive review

Approval Signatures

Food Safety Director	Manager

1. Introduction & Cross-References
2. HACCP Principles (FS-101)
3. Food Storage Standards (FS-115)
4. Temperature Policies (FS-205)
5. Food Receiving Procedures (FS-302)
6. Personal Hygiene (FS-410)
7. Hand Washing Procedure
8. Cross Contamination Prevention
9. Cleaning & Sanitization Schedule
10. Pest Control
11. Equipment Cleaning
12. Food Expiration Handling
13. Daily Temperature Logs
14. Food Recall Procedure
15. Emergency Food Safety Procedures
16. Inspection Preparation
17. Internal Audits
18. Food Safety Incident Reporting
19. Weekly Checklists
20. Monthly Audits
21. FAQs & Operational Scenarios

1. Introduction

This manual establishes mandatory food safety and hygiene standards for all Copperleaf Kitchens locations. It aligns with regulatory requirements and internal policies. Cross-references: WM-204 (Waste Management), BO-410 (Business Operations), CP-502 (Cleaning Products), SP-205 (Supplier Policy).

2. HACCP Principles (FS-101)

HACCP is a systematic preventive approach to food safety. The seven principles are:

1. Conduct hazard analysis for biological, chemical, physical risks.
2. Determine Critical Control Points (CCPs) in preparation and storage.
3. Establish critical limits for each CCP (e.g., cooking temperatures).
4. Implement monitoring procedures (e.g., temperature logs).
5. Define corrective actions if limits are exceeded.
6. Verify and document HACCP effectiveness (internal audits).
7. Maintain records (logs, checklists).

3. Food Storage Standards (FS-115)

- Store raw, cooked, and ready-to-eat foods separately using color-coded containers.
- Follow FIFO (First In, First Out) principle.
- Label all items with date and time of receipt.
- Keep storage areas dry, clean, and well-ventilated.
- Use sealed, food-grade containers; never store food directly on the floor.

4. Temperature Policies (FS-205)

Refrigerator Temperature Policy

- Maintain refrigerators at **0–5°C (32–41°F)**.
- Check and record temperatures every 4 hours.
- If temperature exceeds 5°C, take corrective action immediately (see section 13).

Freezer Temperature Policy

- Maintain freezers at **-18°C (0°F)** or colder.
- Check and record temperatures at start and end of each shift.
- Do not overload freezers; ensure proper air circulation.

Cooking Temperature Standards

Food Type	Minimum Internal Temperature
Poultry & stuffed meats	74°C (165°F)
Ground meats (beef, pork)	71°C (160°F)
Fish & seafood	63°C (145°F)
Reheated leftovers	74°C (165°F)

5. Food Receiving Procedures (FS-302)

- Inspect all deliveries for temperature, packaging integrity, and expiry dates.
- Refrigerated items must arrive at ≤5°C; frozen items at ≤-18°C.
- Reject contaminated or damaged goods; document on receiving log.
- Transfer received items to appropriate storage within 15 minutes.
- Cross-reference: SP-205 (Supplier Policy) for approved vendors.

6. Personal Hygiene (FS-410)

- Wear clean uniforms, hair restraints, and closed-toe non-slip shoes.
- Remove jewelry and nail polish; keep nails short.
- Report illness (vomiting, diarrhea, fever) to supervisor immediately.
- No eating, drinking, or smoking in food preparation areas.

7. Hand Washing Procedure

1. Wet hands with warm water.
2. Apply soap and scrub all surfaces for at least 20 seconds.
3. Rinse under running water.
4. Dry with single-use paper towel.
5. Turn off faucet with paper towel.

8. Cross Contamination Prevention

- Use color-coded cutting boards (red = raw meat, green = produce).
- Sanitize all surfaces and utensils between tasks.
- Store raw meat below ready-to-eat foods in refrigerators.
- Keep cleaning chemicals separate from food (CP-502).

9. Cleaning & Sanitization Schedule

Area	Frequency
Kitchen surfaces	Every 4 hours / after task
Floors	Daily / spill cleanup
Waste bins (WM-204)	End of shift
Dishwasher	Daily

10. Pest Control

- Seal gaps around doors, windows, and pipes.
- Inspect deliveries for pest signs.
- Use approved bait stations; log all pest activity.
- Contractor visits monthly (cross-reference BO-410).

11. Equipment Cleaning

- Unplug and disassemble equipment before cleaning.
- Wash with food-safe detergent and sanitize according to CP-502.
- Calibrate thermometers weekly.

12. Food Expiration Handling

- Discard any food past the expiration date.
- Apply FIFO; mark received dates.
- Inspect stored food daily for spoilage.

13. Daily Temperature Logs

Record refrigerator and freezer temperatures on the daily log. Example:

Shift	Fridge Temp	Freezer Temp	Initials
Morning	3°C	-18°C	JW
Evening	4°C	-19°C	AL

14. Food Recall Procedure

- Identify recalled product batch/lot from supplier notice.
- Remove item from inventory; quarantine in labeled area.
- Complete recall log and notify Food Safety Director.
- Return product to supplier or dispose per WM-204.

15. Emergency Food Safety Procedures

- Fire: Evacuate, call 911, close doors.
- Flood/power outage: Seal refrigerators; discard food above 5°C for 2+ hours.
- Chemical spill: Use spill kit, evacuate area, follow BO-410.

16. Inspection Preparation

- Ensure all logs and checklists are current.
- Verify staff training records.
- Conduct pre-inspection walkthrough (see monthly audit).

17. Internal Audits & Monthly Audits

Internal audits occur quarterly; monthly audits include:

- Review temperature logs, cleaning schedules, pest control records.
- Verify HACCP compliance and staff hygiene.
- Document findings and corrective actions.

18. Food Safety Incident Reporting

Report all incidents (illness, injury, contamination) within 24 hours using the incident form. Include root cause and corrective action.

19. Weekly Checklists

- Check all equipment temperatures.
- Inspect all storage areas for expired food.
- Verify cleaning log completeness.

20. FAQs & Operational Scenarios

FAQ

Q: What if the refrigerator fails?

A: Move food to a working unit; record temperatures; service immediately.

Operational Scenario

Scenario: A delivery arrives at 8°C.

Action: Reject the shipment, note on receiving log, contact supplier (SP-205).

Decision Tree / Workflow

Food temperature check	In range?	Yes → Continue No → Corrective action & log
