

Copperleaf Kitchens Supplier & Procurement Policy

Document ID: SP-001 | Version: 1.0 | Effective Date: [Current Date]

Applicable Policy IDs: SP-101, SP-205, SP-310, SP-402, SP-510

1. Purpose & Scope

This policy governs all supplier selection, procurement, and vendor management activities at Copperleaf Kitchens. It ensures consistency, quality, cost control, and compliance across our supply chain.

2. Approved Suppliers

Only suppliers listed on the Approved Suppliers List (ASL) may be used for routine purchases. All suppliers must be vetted through the Vendor Registration process.

Supplier Name	Category	Status
FreshHarvest Foods	Produce	Preferred
Green Valley Produce	Produce	Approved
Prime Kitchen Supplies	Equipment & Utensils	Preferred
Nile Fresh Logistics	Cold Chain Logistics	Approved

2.1 Preferred Suppliers

Preferred suppliers receive priority for orders, shorter payment terms, and collaborative planning. Current preferred suppliers: FreshHarvest Foods, Prime Kitchen Supplies.

2.2 Emergency Suppliers

Emergency suppliers may be used only when no approved supplier can meet urgent needs. They must be approved by the Procurement Manager before order placement. A list of pre-vetted emergency suppliers is maintained by the Procurement department.

3. Supplier Evaluation

All suppliers are evaluated annually using a scoring system. Criteria include quality, delivery, pricing, responsiveness, and compliance. Scores are recorded in the Supplier Scorecard.

Supplier Scorecard Example

Supplier	Quality (30%)	Delivery (25%)	Price (20%)	Responsiveness (15%)	Compliance (10%)	Total
FreshHarvest Foods	28	24	18	14	10	94
Green Valley Produce	25	22	19	12	9	87

4. Vendor Registration

Suppliers must complete a Vendor Registration Form (VRF) and submit relevant certifications. The Procurement team reviews and either approves, conditionally approves, or rejects. Approved suppliers are added to the ASL.

5. Purchase Requests

All purchases must begin with a Purchase Request (PR) submitted via the internal procurement system. PRs require approval based on the Procurement Approval Matrix.

6. Purchase Orders

Once a PR is approved, a Purchase Order (PO) is generated and sent to the supplier. POs must include line items, quantities, agreed prices, delivery dates, and terms. Example PO:

PO #	Supplier	Item	Qty	Unit Price	Total
PO-2024-1234	FreshHarvest Foods	Organic Tomatoes	200 kg	\$2.50	\$500.00

7. Receiving Deliveries

Upon delivery, receiving staff must verify quantities against the PO and inspect for quality. Any discrepancies must be documented on the Receiving Report. Example delivery note:

Delivery Date	Supplier	PO #	Items Received	Condition
2024-11-10	Green Valley Produce	PO-2024-5678	Lettuce (100 heads)	Good

8. Invoice Verification

Invoices must be matched to the corresponding PO and Receiving Report. This three-way match ensures accuracy. Example invoice:

Invoice #: INV-2024-9876	Supplier: Prime Kitchen Supplies
PO #: PO-2024-4321	Amount: \$1,250.00
Line Items: 50 Chef Knives @ \$25.00	Status: Pending Approval

9. Supplier Performance KPIs

Key Performance Indicators (KPIs) are tracked quarterly. Minimum thresholds: On-Time Delivery ≥95%, Quality Score ≥90%, Response Time ≤24 hours.

Supplier	On-Time Delivery	Quality Score	Response Time	Overall Rating
FreshHarvest Foods	98%	95%	2 hours	A
Nile Fresh Logistics	92%	88%	6 hours	B

10. Emergency Procurement

Emergency procurement is triggered when a critical item is needed within 24 hours. The process allows direct contact with pre-approved emergency suppliers. A retrospective PR must be submitted within 48 hours. Example case: A refrigeration unit failed at Copperleaf Kitchens; Nile Fresh Logistics provided emergency cold storage within 3 hours.

11. Inventory Replenishment

Inventory levels are monitored using a reorder point system. When stock falls below the reorder point, a PR is automatically generated. Replenishment orders follow standard procurement procedures.

12. Contract Renewal

Contracts with suppliers are reviewed 90 days before expiry. The Procurement team evaluates performance and negotiates terms. Renewal decisions are approved by the Procurement Manager or Director as per the matrix.

13. Procurement Approval Matrix

Transaction Value	Approval Required
Up to \$5,000	Department Manager
\$5,001 – \$25,000	Procurement Manager
\$25,001 – \$100,000	Director of Operations
Above \$100,000	CEO / Board

14. Corporate Overrides

In exceptional circumstances, corporate leadership may override standard procurement processes. Overrides must be documented in writing and approved by the CEO. All overrides are reviewed quarterly for compliance.

15. Case Study: Supplier Consolidation

In 2023, Copperleaf Kitchens consolidated produce suppliers from five to two (FreshHarvest Foods and Green Valley Produce). This resulted in a 12% cost reduction, 15% improvement in on-time delivery, and simplified invoice processing. The success was attributed to rigorous supplier evaluation and collaboration.
